

The information supplied in these tables is based on the last **5 Hong Kong Racing Seasons** and addresses some of the more important racing variables.

This information can be very valuable when attempting to rank your choices and can also be used as part of a PRICING TOOL. The resulting **Z Rating** is derived from comparing a factor's *observed* results and comparing it to the *expected* results for that variable. It is then normalized into a Z Rating with a standard deviation formula. The more positive the Z Rating, the more statistically likely the horse will finish in the frame.

It should be noted that we have included 12 factors and treated each one *equally*. A refined formula would also weight each factor, which is beyond the scope of this **Free Stat Report**.

Table 1

The data in this Table deals with variables associated with a **Previous Start**. **Section 1** deals with a horse that won or placed in its last start. **Section 2** assesses a horse that won its last start and is now up in Class. **Section 3** gives ratings to those hoses that were the Favorite in its last start and is still racing in the same class. **Section 4** identifies those hoses which are dropping down in Class.

Table 2

Section 1 looks at First Time Starters by Trainer, while **Section 2** deals with chances of horses by Trainers coming off of a 2-month spell.

Table 3

List Trainers by Class and computes their charges' chances at that level.

Table 4

Compares Jockey's Chances by Course and Distance.

Table 5

Rates the Draws by Course and Distance.

Table 6

Assigns values to the TIME between races, by Class.

The data in this Table deals with variables associated with a **Previous Start**.

Section 1 > deals with a horse that won or placed in its last start.

Section 2 > assesses a horse that won its last start and is now up in Class.

Section 3 > gives ratings to those hoses that were the Favorite in its last start and is still racing in the same class.

Section 4 > identifies those hoses which are dropping down in Class.
